## Global Managed Futures Fund

### HIGH RISK

#### Managed Futures

The fund's return profile is designed to exceed traditional equity or fixed income returns and add unique diversification to traditional well-balanced investment portfolios.

The foundation of the Portfolio Manager's investment strategy provides for the deployment of long and or short positions in a portfolio of commodity and financial markets with exchange traded futures, options, forwards, and the respective cash markets thereof. The portfolio manager uses a combination of fundamental and technical factors assisted by a suite of custom proprietary algorithms designed to participate in both bull and bear market environments and trading ranges thereof. The proprietary algorithms are designed to benefit from perceived investor bias by way of pattern recognition relationships in an array of serial compressions.

#### Disclosures

All performance and risk statistics are based on monthly total returns of the lead Series of the fund in Canadian Dollars since the fund's inception. All returns are time-weighted total returns of the F series, net of fees, and annualized for periods one year or greater. Standard Deviation and Downside Deviation are annualized measures of risk. The Sharpe Ratio and Sortino Ratio are risk adjusted measures of excess return. The risk-free rate used to calculate the Sharpe and Sortino Ratio's is 4.246% (10 Year T-Bill Yield on March 31 2025). Under fund fees section, all numbers are annualized, management fees are payable monthly, and performance fees are accrued monthly and payable annually.

Series C of Fieldhouse Pro Funds Trust was previously Class C of Fieldhouse Pro Funds Inc. which had an inception date of February 1st, 2016. Class c of Fieldhouse Pro Funds Inc. converted to Series C of Fieldhouse Pro Funds Trust on January 1st, 2022. The current strategy of the fund started on July 1st , 2023.
